EDUCATION

Web Development

Coding Dojo, Silicon Valley
PHP, Python, and MEAN

Mar 2016

Bachelor of Science, CIS

CSU Stanislaus, Turlock CA

Dec 2013

EMPLOYMENT

MoveZ, Inc

Web Developer

June 2016-Present

- Developed a web app in which the process between drivers and shippers is fully automated with no go-between.
- Communicated with the CEO and others involved in the process of building the web to ensure thorough understanding.
- Programed in HTML, CSS, Javascript, JQuery, NodeJS, Jade, MongoDB, and ExpressJS, with a accompanying android app.

Good Karma Bikes

Web Developer

May 2016

- Collaborated in a Scrum Agile process with two week sprints delivering new features and working software at each sprint.
- Worked in a team of five to plan and implement an admin dashboard for a non-profit, goodkarmabikes.org.
- Used JavaScript, Ruby, PostgreSQL, Ruby on Rails, AngularJS and Bootstrap in creation of the website.

AT&T

Premises Technician

2014-2016

- Saved the company money by streamlining the installation and repair process for Internet, TV, and phones services.
- Discovered an error in one of our routers causing a loss of internet connection through troubleshooting.
- Educated customers on equipment and service in order to give an unparalleled user experience.

Spotlight Security Services

Security Guard

2012-2014

- Improved safety and general well being through frequent vehicle patrols of assigned area.
- Informed business owners and their employees of ways they can help prevent theft or any other forms malice.
- Fielded questions from business owners and passed on issues to my supervisor through daily reports.

Projects

Warrior Security

Website built for my brother who started his own security guard business in Turlock and utilizes both Facebook and Googlemaps APIs.

Swift Shift

An application designed in Python utilizing Twillio's API for voice and text communication, with the goal of improving efficiency for technicians in the work force.

Good Karma Bikes

As a part of a team of five working on the front-end, admin dashboard, I helped deliver new features and working software at each sprint

Custom Skill: Safe Steal

As a part of a team of three, I made it possible for the Amazon Echo to link with the Twilio API and make 911 calls or texts in case of home invasion.
